❞ About me

Sr Software Engineering/ Modul lead- Seeking Roles in Web Development, Web Application, Requirement Gathering, Requirement Analysis, Troubleshooting, MS SQL Serve, Software Engineering & Software Design

Profile Summary

With over 8 years of experience in software development, I have honed my skills in C#, ASP.net Core, Microservices, Entity Framework, MVC, and Angular Js. I have a proven track record in developing complex applications using SQL SERVER and AZURE SERVICES. I have led modules in my previous role at LTIMindtree, where I managed end-to-end industrial safety, health, and environment processes. I have also worked on a web-based management system that provides quick access to critical 12-Lead records sent from ZOLL defibrillators. My experience also includes creating a call tracking database for a technical support department CRM, which enabled real-time data to multi-location call centers. I am proficient in Agile technology and have a strong understanding of DevOps.
